CERTIFICATION

Pantheon stones products have the following certifications:

NSF: The NSF certification of the Pantheon stone products shows that our products are completely safe for final use, such as contact with food, installation, and cleaning.

SGS: The SGS certification states that Pantheon stone products meet all technical requirements to be sold within Canada. (CE certification for the European Market)

Greenguard: Greengaurd certification assures costumers and fabricators that our products have very low and safe level of chemical emissions, both while installation and production. This means our products are environmentally safe, and will not affect air quality where the product is installed.
